**median rank, based on p–values (mixed directional up)**

Legend:
- ■ fisher (red)
- ● stouffer (yellow-green)
- ▲ reporter (green)
- ◆ tailStrength (blue)
- ■ wilcoxon (magenta)

Y-axis categories (top to bottom):
immune system process
innate immune response
adaptive immune response
neutrophil degranulation
specific granule membrane
negative regulation of cell prolife...
protein binding
extracellular region
cytoplasm
cytosol
apoptotic process
inflammatory response
positive regulation of DNA binding ...
leukocyte migration
extracellular exosome
regulation of immune response
defense response to virus
viral process
protein homodimerization activity
chromosome
neutrophil chemotaxis
immune response
T cell differentiation
cellular protein metabolic process
nuclear chromosome
regulation of megakaryocyte differe...
GTP binding
GTPase activity
positive regulation of angiogenesis
phagocytic cup
spindle
anaphase–promoting complex–dependen...
secretory granule membrane
IgG binding
interferon–gamma–mediated signaling...
lipopolysaccharide–mediated signali...
positive regulation of tumor necros...
negative regulation of viral genome...
protein targeting to membrane
platelet aggregation
Arp2/3 complex–mediated actin nucle...
regulation of gene silencing by miR...
antigen processing and presentation...
type I interferon signaling pathway
regulation of inflammatory response
signaling pattern recognition recep...
CENP–A containing nucleosome assemb...
response to virus
Fc–gamma receptor signaling pathway...
positive regulation of protein loca...
chaperonin–containing T–complex
positive regulation of phagocytosis
negative regulation of viral entry ...
negative regulation of gene express...
regulation of hematopoietic stem ce...
positive regulation of cytokine sec...
DNA–templated transcription, initia...
phagocytosis, engulfment
